According to the Environment Agency _____, in 20 years-time there will be 33 per cent more vehicles on our roads. There is conclusive evidence that road transport has a major impact on the environment. Traffic is responsible for 22 per cent of the UK's carbon dioxide output (Foley and Fergusson _____ and emits significant amounts of other air polluting gases such as carbon monoxide and nitrogen oxide _____ 1999) .

Cairns _____ p. 75) argues that although "fuel and vehicle developments have made a huge difference to local air quality", measures to reduce traffic will also be required if the Government is to achieve its targets on air quality. One such measure is congestion charging which, according to a recent study by _____ (2005), has been successful in reducing vehicle emissions in London.
