

Lecture Listening Comprehension EXAMPLE

Aim: To develop the students' ability to listen to a long lecture, to take notes, use those notes to answer a number of comprehension questions and then reflect on the lecture critically.

Lesson Time: Approximately 2:00 hours

Lead in

- Ask Students to read the 'title' & predict the content of the lecture.
- Ask students to write down key terms & language from the discussion.
- Feed in / check key vocabulary.

Differentiation

Challenging

1. Students listen once & take notes (*Use the blank note-taking page or page with sub-headings*).
2. Give 5 minutes to tidy notes.
3. Listen again & add to notes (use a different colour pen).
4. Distribute questions. Set 30 minutes to answer using their notes.
5. Feedback: Distribute or project **ANSWERS**.

Medium

1. Students listen once & take notes (*Use the blank note-taking page or page with sub-headings*).
2. Distribute questions. Set 20 minutes to answer using their notes.
3. Listen again. Students answer the missed questions as they listen.
4. Give an extra 10 minutes to consolidate answers.
5. Feedback: Distribute or project **ANSWERS**.

Easier

1. Distribute questions. Students have 15 minutes to read the questions.
2. Students listen & answer the questions.
3. Give 10 minutes to tidy answers.
4. Students listen again. Check answers & answer missed questions.
5. Give 10-15 minutes to tidy answers.
6. Feedback: Distribute or project **ANSWERS**.

Critical thinking questions

Option 1: Students individually reflect on the questions, make notes of their responses and write a short critical response paragraph to submit for teacher or peer feedback.

Option 2: Students ask and answer the questions in small groups.

Heart Failure **EXAMPLE**

[Listening Comprehension Questions]

Author: Joseph Alpert

University: United States Medical Licensing Examination

Subject & Title: Medicine: *Heart Failure*

Date: 2018

Time: 37:00

Level: **** * [B2/C1]

Link: <https://www.youtube.com/watch?v=eThrxyAobsQ>

Check these words and phrases before listening:

Key vocabulary

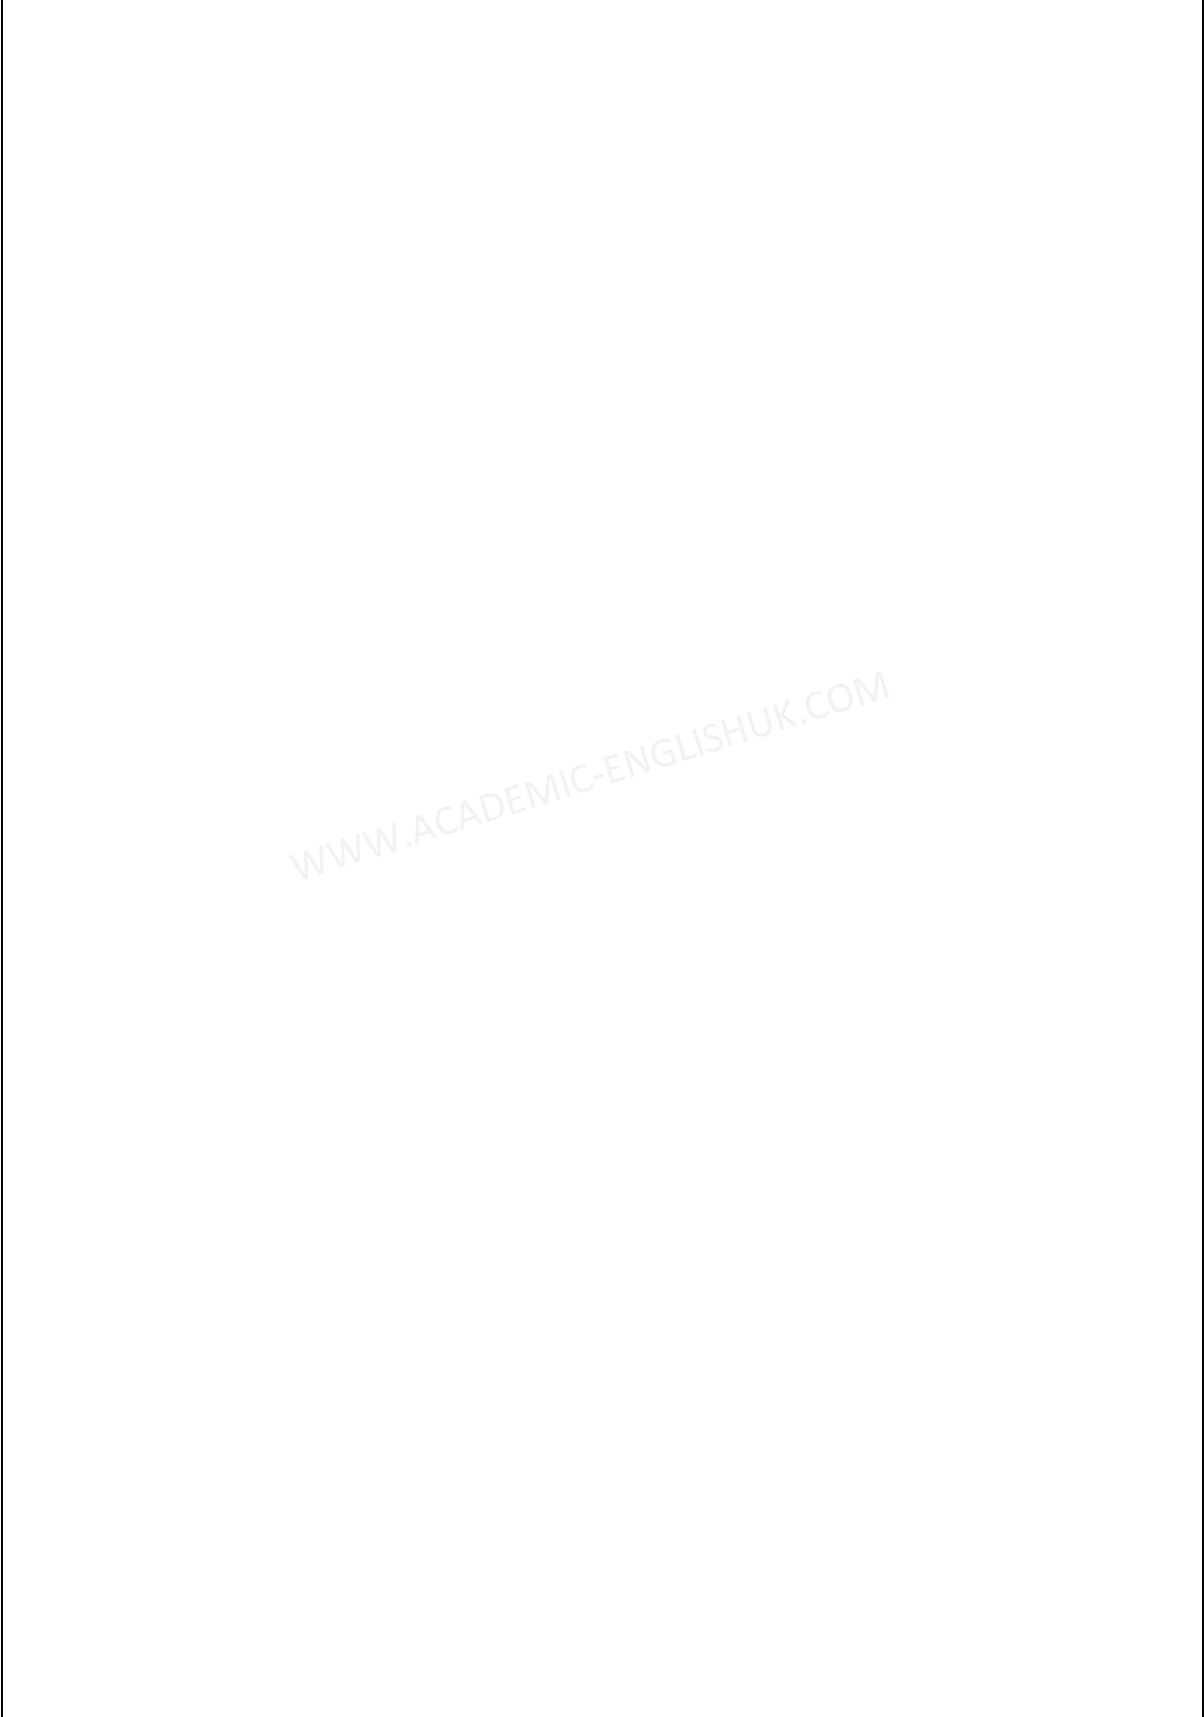

1. Arrhythmia.
2. Atherosclerosis.
3. [REDACTED]
4. Bypass.
5. [REDACTED]
6. Cardiomyopathy.
7. Cholesterol.
8. [REDACTED]
9. Contractility.
10. Electrocardiogram (ECG).
11. [REDACTED]
12. Fluid accumulation.
13. [REDACTED]
14. Neurohormonal system.
15. [REDACTED]
16. Pacemaker.
17. [REDACTED]
18. Retention.
19. Shortness of breath.
20. [REDACTED]
21. Swelling.
22. Sympathetic nervous system.
23. [REDACTED]
24. Ventricle.

8. Summary

Heart Failure – Josph Alpert **EXAMPLE**

<https://www.youtube.com/watch?v=eThrxYAobsQ>

Use your notes to answer the following questions using the sections headings to help you.

1. Introduction

1.1. How is heart failure defined?

1.2. How many [redacted] each year in the US?

1.3. In which [redacted] most common?

1.4. What does he refer to by the term 'growth industries'?

1.5. What [redacted] and afterload?

1.6. What [redacted] heart failure?

2. Pathophysiology

2.1. Explain what Starling's Law is.

2.2. How is [redacted] ?

2.3. What is the [redacted] ?

2.4. What are the **FIVE** compensatory mechanisms someone with heart failure?

- i.
- ii.
- iii.
- iv.
- v.

2.5. What lead to?

3. Types of heart failure

3.1. How do left-sided and right-sided heart failure differ from each other?

3.2. At what symptoms?

4. Causes

4.1. What are the risk of heart failure?

5. Symptoms

5.1. Name with heart failure.

- i.
- ii.
- iii.
- iv.
- v.
- vi.
- vii.
- viii.

6. Tests

6.1. What kinds of heart failure?

7. Treatment

7.1. What are diuretics and at what stage of heart failure are they used?

7.2. Name FIVE [redacted] from progressing?

- i.
- ii.
- iii.
- iv.
- v.

7.3. Why are beta blockers [redacted] the effects of heart failure?

8. Summary

Critical thinking: *What do you think of this lecture? Has anything surprised you? If so, what? What was [redacted] he gave need [redacted] do tests on the heart after a [redacted] make healthier lifestyle choices? [redacted] and doctors? Why aren't we [redacted] and its impacts? [redacted] smoking and encourage physical activity, is this working? What could be the real underlying problem?*

Heart Failure **ANSWERS**

1. Introduction

1.1. How is heart failure defined?

Heart failure is the inability of the heart to pump enough blood to meet the demands of the body. A decreased cardiac output triggers an increase in blood volume and fluid accumulation, which in turn leads to oedema and circulatory congestion.

1.2. How many new patients are diagnosed with heart failure each year in the US?

Approximately 400,000.

1.3. In which group of people is heart failure most common?

For African-Americans the long-term outlook is worse, mainly due to socio-economic reasons. Heart failure is
