Seminars

1. An overview of how a seminar works

- Students work together in groups of 4-6.
- Teachers provide a set of questions.
- Students discuss for 25-30 minutes (approx 5 mins per person).
- Students summarise the key points in the last 5 mins.
- Students CAN refer to the texts and their notes.
- Teachers monitor and give feedback at the end.

2. Pre-seminar task

- Students:
 - i. Take notes on the reading text and lecture.
 - ii. Predict question types and practice formulating answers.
 - iii. Work with a partner to practice asking and answering questions about the texts.
- ◆ **Differentiation (low levels): distribute questions for students to prepare in advance.**

3. The seminar

- The group are called into a room, and they sit around a table.
- The questions are given out and students have 2 minutes to read and prepare by taking notes.
- The seminar begins with an opening statement – *we're here today to discuss...*
- The students then begin to discuss the first question.
- Each student should make a contribution by referring to their notes / texts.
- The seminar should flow with students adding to what was previously said.
- Once everyone agrees the question has been addressed in full, then they move onto the next question.
- **Important:** Not all the questions have to be answered but they should be discussed in order.
- Once the students begin to approach 25 minutes, they should bring it to an end by each one summarising a main point raised.

4. Points to remember

- It should be a flowing conversation with everyone involved and contributing.
- The teacher / tutor should not intervene if it goes quiet but let the students manage the discussion.
- Students have to show confidence and demonstrate thorough awareness of the texts.
- Dominant students are penalised for not sharing and including others.
- Students should be penalised for just reading notes.
- Key debate phrases should be used to show conversation skills - agreeing, disagreeing, interrupting, etc...

Seminar Questions

Key sources:

Reading: **Wilson (2023)**

Alzheimer's Association (2020); Alzheimer's Society (2022); Mayo Clinic (2021); National Health Service (NHS) (2023); National Institute on Aging (NIH).

TED Talk Lecture 1: **Cohen (2015)**

TED Talk Lecture 2: **van Amerongen (2018)**

1. What is dementia? (Give examples to support your ideas).
2. Discuss some of the key facts and data connected to dementia.
3. What are the main types of dementia? (Include specific details).
4. What are the key causes of dementia and how can it be treated?
5. Why is dementia research under-funded and not taken as seriously as cancer? Is there a cure for dementia?
6. What are the best ways to take care of dementia patients?
What are the problems with the dementia village programme?
7. Critical thinking - is there anything in the text or lectures that you would question and/or disagree with?
