

AI Speaking Questions

Part 1: Personal Experiences with AI

1. How often do you use AI tools like chatbots or translation apps in your daily life? What do you use them for?
2. How do you use AI to help you study or practice English? What are the advantages and disadvantages?
3. Can you think of an app or website you use regularly that relies on AI recommendations (like Netflix, Spotify, or TikTok)? How accurate are its suggestions?
4. What funny or frustrating misunderstanding have you have recently while talking to an AI assistant like Siri, Alexa, or ChatGPT etc...?
5. If you could have a personal AI robot to handle one household chore for the rest of your life, which chore would you choose and why?

Part 2: AI in Education and the Workplace

6. Some people worry that AI will take away many human jobs. What kinds of careers do you think are the safest from AI automation?
7. Do you think students should be allowed to use AI tools to help write their school essays, or is that a form of cheating?
8. Imagine your boss or teacher is replaced by an AI system. What would be the advantages and disadvantages of working under a robot manager?
9. How can schools and universities change their teaching styles to prepare students for a world full of artificial intelligence?
10. If an AI could complete all your work or homework perfectly in seconds, how would you spend all the free time you would gain?

Part 3: Ethics and Society

11. Many AI systems are trained on human data, which means they can sometimes make biased decisions. How can we make sure AI treats everyone fairly?
12. If an AI system makes a serious mistake, such as causing a car accident in a self-driving vehicle, who should be blamed: the owner, the car, or the programmer?
13. Some people feel lonely and look for companionship by talking to AI friends or dating simulators. Do you think AI can ever replace real human relationships?
14. How do you feel about "deepfakes" (AI-generated videos or images that look real but are completely fake)? What problems can they cause for society?
15. Do you think governments should create strict rules to control the development of AI, or should tech companies be left alone to innovate?

Part 4: The Future of AI

16. Look ahead 20 years into the future. Do you think AI will make human lives significantly better, or will it create more problems than it solves?
17. If scientists successfully create an AI that can feel real emotions like joy, sorrow, and pain, do you think we should grant that machine legal rights?
18. In what ways do you think AI will transform the field of medicine and healthcare over the next decade?
19. Many science fiction movies show robots turning against humans. Do you think this is a realistic fear, or is it just dramatic Hollywood entertainment?
20. If you were given the choice to safely upload your mind and memories into a digital cloud to live forever as an AI, would you accept it? Why or why not?
